The repullican primaries for this county are n's rised fir to-morrow. It is useless, of cire, to advise of urge republicans in general to attend these so-tailed primaries for they will not the main reason why they will not prospecte from their knowledge of leffect that ny store that attends is a price so nall with the business would be white useless. What is business would be white useless. It is business would be so had been a farce in Multicough. Mindplaying has created in our politics a system under a light first increase who attend to the sit of thought fees signally they are on han every tone with a rised fr to-morrow. It is useless, of well organized free the whole much nery s in their hands in childing the probling the lepositing and the counting fit to ballets and the form is merely of servel a later to cover the farce and invest it with an appearance of "regularity". As mader of fact the board of measurements which consider a board of managers, which consists of about three per managers, well amounce et once the names of the delegates they have 'elected' to the county convendon,—for they have been electing" them for a month past, have long since fully completed the list, and have in structed the "delegates as to the nom nations that are to be made. In fact there is no need whatever either of the so-called primary or the so-called convention, since the board of man agors will make the ticket—indeed, have made it already. To simplify matters THE ORRHONIAN therefore humbly requests that the regents de clare the so-called primary and the so-called convention "off," and over their own names give us the licket we are to rote. There are a great many of us who, though not hard to please, dislike shame, farces, e puvocutions in directions and humbugs, and therefore prefer to take our saits and castor oil "straight, without the injury of an endeavor to disguise them in sugar or other sweets that only make them more meous to the taste, while at the same time they suggest to the mind a disgussing attempt to practice imposition and deception. Algebra ists always instruct their pupils to express in simplest form the quantities they are dealing with Give us the same rule of expression in politics The arts of dupery and imposture, un less a vell can be held over them should be abandoned Plain nude is better than half-dis-gulated meretricious. His learning was so small that his plays are full for historical and geographical anathri nisms. He makes Hector of Trev mote Aristotle makes the Greek Theseus talk the mythology of the Goths, in the Winter e Tale he makes a party take ship from Bohemia to nicity which is like taking steamboat from Helena to Portian i Of course a man of learning, study and travel, like Bacon could not possibly make the se blunders any more than I ongfellow or Lowell could violate the drawning unities of American history, geography and literature. That Shakespear the author of the plays that bear his name we have authority from his patron, Lord bouth ampton, who was well acquainted with Bacon we have the authority of Ben Jonson who says 'He was not of an age but for all time. Jon con was not only a man of genius as a framatic poet, but was a man of learning. The N Y Sun adds to the testimony as follows
